OBJECTIVE

Excite students about the opportunities in Network Technologies. As a Professor in the IT field since 1993 I have enjoyed my students and their ability to work through the lessons and in the end get certified and find a great job they love.

I have also been in customer service and sales for almost 30 years. I owned and operated a motorcycle moped service company with 12 employees. I worked in sales at Sears appliance and electronics center. I was the internet sales manager at Toyota of Gainesville and was number two salesperson.

DAVID DEPATIE - CV

Retired from University of Florida 12/2025
